Aiming For Excellence - Being The Best We Can Be

Number

Number and Place Value

I can count from 0 in multiples of 4, 8, 50 and 100; find 10 or 100 more or less than a given number.	
I can recognise the place value of each digit in a three-digit number (hundreds, tens, ones).	
I can compare and order numbers up to 1000.	
I can identify, represent and estimate numbers using different representations.	
I can read and write numbers up to 1000 in numerals and in words.	
I can solve number problems and practical problems involving these ideas.	

Number

Addition and Subtraction

I can add and subtract numbers mentally, including:	
a three digit number and ones;	
a three-digit number and tens;	
a three digit number and hundreds.	
I can add and subtract numbers with up to three digits, using formal written methods of columnar addition and subtraction	
I can estimate the answer to a calculation and use inverse operations to check answers.	
I can solve problems, including missing number facts, place value, and more complex addition and subtraction.

Number

Multiplication and Division

I can recall and use multiplication and division facts for the 3, 4 and 8 multiplication tables.	
I can write and calculate mathematical statements for multiplication and division using the multiplication tables that they know, including for two-digit numbers times one-digit numbers, using mental and progressing to formal written methods.	
I can solve problems, including missing number problems, involving multiplication and division, including positive integer scaling problems and correspondence problems in which *n* objects are connected to *m* objects.	

Number

Fractions

I can count up and down in tenths, recognise that tenths arise from dividing an object into 10 equal parts and in dividing one-digit numbers or quantities by 10.	
I can recognise, find and write fractions of a discrete set of objects: unit fractions and non-unit fractions with small denominators.	
I can recognise and use fractions as numbers: unit fractions and non-unit fractions with small denominators.	
I can recognise and show, using diagrams, equivalent fractions with small denominators.	
I can add and subtract fractions with the same denominator within one whole [for example, 5/7 + 1/7 = 6/7].	
I can compare and order unit fractions, and fractions with the same denominators.	
I can solve problems that involve all of the above.	

Measurement

I can measure, compare, add and subtract: lengths (m/cm/mm); mass (kg/g); volume/capacity (l/ml).	
I can measure the perimeter of simple 2-D shapes.	
I can add and subtract amounts of money to give change, using both £ and p in practical contexts.	
I can tell and write the time from an analogue clock, including using Roman numerals from I to XII, and 12-hour and 24-hour clocks.	
I can estimate and read time with increasing accuracy to the nearest minute; record and compare time in terms of seconds, minutes and hours; use vocabulary such as o'clock, a.m./p.m., morning, afternoon, noon and midnight.	
I can know the number of seconds in a minute and the number of days in each month, year and leap year.	
I can compare durations of events [for example to calculate the time taken by particular events or tasks].	

Geometry - Properties of Shapes

I can draw 2-D shapes and make 3-D shapes using modelling materials; recognise 3-D shapes in different orientations and describe them.	
I can recognise angles as a property of shape or a description of a turn.	
I can identify right angles, recognise that two right angles make a half-turn, three make three quarters of a turn and four a complete turn; identify whether angles are greater than or less than a right angle.	
I can identify horizontal and vertical lines and pairs of perpendicular and parallel lines.	

Statistics

I can interpret and present data using bar charts, pictograms and tables.	
I can solve one-step and two-step questions [for example, 'How many more?' and 'How many fewer?'] using information presented in scaled bar charts and pictograms and tables.
